Piscina (TO), 19 September 2019

H-ON has been consulting our company in the field of Oil & Gas with the aim of obtaining Technical Passports to supply our products to the Eurasian marketplace and comply with local requirements.

We appreciated H-ON Managers for their technical expertise and ability to empathize. Thanks to their flexible approach they were able to greatly support us in every phase of the project.

Their speed of execution is a further distinctive quality that makes H-ON Consulting the right partner for our business.

Sincerely,

Roberto Veronese
Quality Control Inspector
