

At Bormioli Rocco we export our products to over 100 countries worldwide and we are one of the major glass manufacturers in the international market. We chose H-ON Consulting to provide machine restoring services for our company. In doing so we have been able to accurately analyze our production lines against the safety requirements needed.

A few of the advantages we have received by partnering with H-ON have been their highly technically skilled engineers; and continuous reliability on managing projects that have exceeded the expected quality level.

H-ON is a consulting partner who understands the customers' needs from the very beginning. The engineers can best be described as having the ability to continue to consistently gain expertise on the job, but are able to avoid thinking like they are the only experts.

Riccardo Bottura
Head of Industrial Operations

A handwritten signature in blue ink, appearing to read "Riccardo Bottura", written over the printed name and title.
