

H-ON Reference Letter

We have known H-ON Consulting for many years and have had the chance to work with them through several projects. We really appreciate their honest and modest approach. If H-ON says “we can do it” this is an absolute assurance of the projects future success. Another distinctive factor is the company’s decision making process, which is fast and smart in all commercial and project management areas.

Once you try and complete the first project with H-ON you quickly realize that you have found a partner for future projects. The three biggest benefits you receive by partnering with them are flexibility to adapt to the customers’ needs on different kinds of projects; high technical skilled engineers; and reliability on managing projects on time with the expected quality level.

H-ON is able to offer technical and engineering services for highly complex projects with the same technical level as the main big players in the consulting business. However, they are able to offer more flexibility with a customer oriented approach. H-ON is a consulting partner who understands the customers’ needs from the beginning and is more than able to “run at your speed” delivering the right service, at the right time, with the right price.

*Sincerely,
Daniel Galli
Plant manager*
